

STATIONARY COMPACTORS

Made for long-term waste control, stationary compactors compress large amounts of material into easy-to-manage loads. Their solid build and steady performance make them a smart choice for businesses looking to save time, space, and money.

BWE Stationary Compactors, sometimes called a breakaway compactor, is a heavy-duty machine that compresses dry waste & recyclables to reduce their volume for disposal. Our Stationary Compactors are available in sizes ranging from 2 to 5 cubic yards. Stationary compactors are built separate from the compaction container, and is bolted to the ground during installation. When it is time for disposal, the compactor remains in place, while the container detaches and is hauled away

With their powerful hydraulic systems and sturdy construction, breakaway compactors can help businesses save money on disposal costs, and reduce environmental impact, improving overall waste management efficiency.

Multiple load options are available to ensure we can meet the needs of each customer's site
